Narrative

Narrative: Big bear medic ambulance 282A responded to a motor vehicle accident on highway 38 with medic engine 96 on scene prior to our arrival. Initial patient care and assessment performed by medic engine 96. Patient states he was traveling approximately 35 miles per hour, when the vehicle in front of him went to make a left turn. The patient also states that he was unable to avoid the vehicle and collided. The patient's vehicle came into contact with the other vehicle on the front driver side. Patient's vehicle had moderate damage to the front end with airbag deployment. Patient has full recall of the event. No blood thinning medications reported. Patient is alert and oriented times four with a GCS of 15. Breathing full and effective with clear lung sounds bilaterally. Moves all extremities appropriately with PMSC intact throughout. Patient has 6/10 pain to the right hip pain palpitation or movement. No crepitus or deformity noted upon palpation. Patient has a skin tear to the right hand with bleeding controlled with Kerlex bandage. No other outward signs of trauma noted in secondary assessment. Patient denies any head, neck, or back pain. Patient also denies any headache, nausea, shortness of breath, or chest pain. Loma Linda base was contacted on scene due to the patients age and mechanism. Loma Linda base instructed us to go to Bear valley community hospital. Patient was a carried to gurney and loaded into the ambulance. Transported code 2 to BVCH with no change in status. Patient care was transferred to registered nurse upon arrival.
