No past surgical history on file.

Medications:

Current Outpatient Medications

Medication	Instructions
• acetaminophen (TYLENOL)	1,000 mg, oral, Every 6 hours PRN
• ibuprofen (MOTRIN)	400 mg, oral, Every 6 hours PRN
• lidocaine (LIDODERM) 5 % patch	1 patch, transdermal, Daily, Remove and discard patch within 12 hours or as directed by MD.

No outpatient medications have been marked as taking for the 3/1/24 encounter (Hospital Encounter).

Allergies:

Allergies

Allergen	Reactions
• Lisinopril	Other (see comments)
Other Reaction(s): Dry cough	

Social History:

Lelia M Martinez

Exam:

Patient Vitals for the past 24 hrs:

	BP	Temp	Temp src	Pulse	Resp	SpO2
03/01/24 1026	143/67	—	—	71	—	100 %
03/01/24 0822	163/49	37.2 °C (99 °F)	Oral	92	18	98 %

Physical Examination:

Vital signs are reviewed and are notable for hypertension consistent with her history but otherwise normal. This is a well-developed, well-nourished patient who is awake, alert, and in no apparent distress. She was given a c-collar at triage.

HEENT: Normocephalic, atraumatic. Oropharynx is benign with moist mucous membranes. No evidence of any facial trauma.

Cervical and thoracic spine are somewhat tender to palpation, along with the paraspinous muscles. Lumbar spine is nontender. No visible signs of trauma on the back.

Lungs: Breathing is unlabored; no accessory muscle use. Lungs are clear.

Heart: regular rate and rhythm. Chest wall is stable and nontender except for some mild tenderness in the right axillary region without visible trauma.

Abdomen soft, nondistended, nontender. No seatbelt sign.

Adm: 3/1/2024, D/C: 3/1/2024

03/01/2024 - ED in Scripps Mercy Hospital San Diego Emergency Department (continued)

Notes - LMR (continued)

ED Course and Medical Decision Making:

I considered a differential diagnosis of cervical spine strain or fracture, thoracic spine strain or fracture, concern for rib fracture or chest wall contusion or pulmonary contusion. Patient otherwise looks well, denies any significant head trauma, denies being on blood thinners, and I do not feel she needs cranial imaging. We will do a CT scan of her T-spine and C-spine and chest x-ray. She is medicated with Tylenol. Bedside E-FAST ultrasound was negative as done by me. Clinical complexity is moderate.

Work-up results:

I independently reviewed the results of each diagnostic test, which showed: Negative chest x-ray, and no evidence of fracture or misalignment on CT of the cervical and thoracic spines, though she does have degenerative changes.

I independently reviewed the images interpreted (or being interpreted) by Radiology and formed my own impression.

Observation Care:

Patient was entered into observation care.

Evaluation began at 8 AM in the emergency department.

Serial examinations and reassessments were performed on this patient to determine if they would improve versus require further intervention, testing, or admission.

It is currently 10:30 AM, and the patient is improved after Tylenol and ibuprofen and I will plan to discharge her home with prescriptions for Tylenol, ibuprofen, lidocaine patches.

Clinical Impression:

1. **Cervical strain, acute, initial encounter**
2. **Thoracic myofascial strain, initial encounter**
3. **Motor vehicle accident (victim), initial encounter**

CT cervical spine without contrast Reason: trauma [827910294]

Ordering provider: Norton, Valerie Constance, MD Resulted by: Chou, Eric T, MD
03/01/24 0828
Performed: 03/01/24 0946 - 03/01/24 0946 Accession number: 3011999953
Resulting lab: SCRIPPS RADIOLOGY
Narrative:
EXAMINATION: CT CERVICAL SPINE WITHOUT CONTRAST

DATE/TIME: 3/1/2024 9:46 AM

HISTORY: trauma

COMPARISON: None.

TECHNIQUE: CT examination was performed of the cervical spine without intravenous contrast. Dose reduction techniques were utilized for this examination including adjustment of the mA and/or kV according to the patient's size (BMI).

FINDINGS:

CRANIOCERVICAL AREA: Normal foramen magnum with no Chiari malformation.

BONES: No fracture or osseous lesion.

CERVICAL DISCS: Mild degenerative disc disease C4-C5.

PARASPINAL AREA: Normal with no visible mass.

BASE OF NECK: Negative. Incidentally detected thyroid nodules less than 1 cm in diameter in patients less than 35 years of age, and less than 1.5 cm in diameter in patients greater than 35 years of age, do not typically require further imaging evaluation.

LUNG APICES: No abnormality on limited evaluation.

SUPPORTING GUIDELINES FOR NODULES ON LIMITED PORTIONS OF LUNGS (American Medical Association 2019): Not applicable: No nodule(s) or stability of findings compared to prior study.

OTHER: None.

EXPOSURE:

This patient received a total of 2 exposure event(s) during this CT examination. The CTDIvol and DLP radiation dose values for each exposure are:

Exposure: ; Series: ; Anatomy: Neck; Phantom: 32 cm; CTDIvol: 14; DLP: 249

Exposure: ; Series: ; Anatomy: L Spine; Phantom: 32 cm; CTDIvol: 28; DLP: 837

The following accession numbers are related to this dose report {3011999953}:
3011999955

The dose indicators for CT are the volume Computed Tomography (CT) Dose Index (CTDIvol) and the Dose Length Product (DLP), and are measured in units of mGy and mGy-cm, respectively. These indicators are not patient dose, but values generated from the CT scanner acquisition factors. The report includes radiation exposure data for exposures received during this examination. If multiple reports are produced from this examination, the exposure data is duplicated

Author: Norton, Valerie Constance, MD
Filed: 03/01/24 1040
Status: Written

Service: —
Date of Service: 03/01/24 1040
Editor: Norton, Valerie Constance, MD (Physician)

Author Type: Physician
Creation Time: 03/01/24 1040

THANK YOU for allowing us to treat you in the Scripps Mercy San Diego Emergency Department today. Please read these discharge instructions completely. If you have any questions, please ask your doctor or nurse. It is very important for you to understand these instructions and follow the plan that has been outlined to get you on the road to health as soon as possible. To help you further understand your condition, we have provided information about your diagnosis along with the treatment plan in the attached sheets. Please read and ask if you have any questions.

Please note:

- We did not feel you need to be admitted to the hospital today.
- Your condition may change, and if you are concerned you are getting worse, we are happy to see you again at any time.
- Please fill any prescriptions promptly, and take medications as directed.
- Make sure to follow up as instructed for post-emergency department reassessment with your doctor, or with another MD or specialist as directed, within the indicated time. If you cannot, you can go to a community clinic.

---Hillcrest Family Health Center, 4094 4th Ave, San Diego, CA 92103, 619-515-2545

If you cannot arrange follow up, then return to the emergency department for re-evaluation. Failure to follow-up as directed could lead to disability, worsening illness, or even death.

- Please return to the Emergency Dept. right away, if you have worsening symptoms, increasing pain, fever >101F, vomiting, or any other concerning symptoms after discharge.
- If you are a smoker, we recommend you quit smoking. Please talk to your doctor for help, or call 1-800-NO-BUTTS for smoking cessation resources.
- If your blood pressure was higher than 120/80 during your time in the ED, you may have high blood pressure. Please get your blood pressure rechecked within 1 week at a clinic or with your primary care physician.

You can download the myScripps app on your phone and create an account to see any test results and show them to your doctor as needed.

Thank You!

WRITTEN DISCHARGE INFORMATION
To help you manage your health after you leave our care, we will review important information with you at discharge:
☐ I have had my medical condition explained to me and was kept informed about my treatment
☐ I understand what symptoms and health problems to look out for when I go home
☐ I understand the following information about my new and continued medications: - Purpose for taking each medication - Potential Side effects to be aware of
☐ I understand the items I am responsible for after discharge such as: - Follow-up appointments - Outpatient follow-up tests - If the physician I am referred to does not accept my insurance I will call 1-800-Scripps (1-800-727-4777) - If I have an HMO insurance I will have to call my primary care physician to get a referral. - To request a copy of my health records I will contact (760) 633-7746 - I know where to pick up my prescriptions or I have received a copy of my paper prescription
☐ The staff talked with me about whether I have the help I need.
We value your feedback! You may receive a survey and it would mean a lot to our staff if you would take the time to complete it. Thank you for the honor and privilege of caring for you!

Información adjunta

Cervical Strain Understanding (Spanish)

¿Qué es la distensión cervical?

Los siete huesos (vértebras) del cuello forman parte de la columna vertebral. Este tramo se conoce como columna cervical. Distensión cervical es un término médico que define el dolor de cuello. El cuello está formado por varias capas de músculos. Estos están conectados por tendones a la columna cervical y a otros huesos. El dolor de cuello generalmente es la consecuencia de una lesión en estos músculos y tendones.

Los siete huesos (vértebras) del cuello forman parte de la columna vertebral. Este tramo se conoce como columna cervical. Distensión cervical es un término médico que define el dolor de cuello. El cuello está formado por varias capas de músculos. Están conectados por tendones con la columna cervical y otros huesos. El dolor de cuello generalmente es la consecuencia de una lesión en estos músculos y tendones.

Causas de distensión cervical

Distintos tipos de tensión sobre el cuello pueden dañar los músculos y tendones (tejidos blandos) y causar distensión cervical. Los tejidos cervicales pueden resultar dañados cuando sucede lo siguiente:

- Se está forzando el cuello más allá de su rango de movimiento normal, como cuando se produce una lesión por accidente automovilístico o deportivo
- El cuello está sometido a una tensión constante de intensidad baja, como cuando se adopta una mala postura o el espacio de trabajo no está bien dispuesto

Síntomas de distensión cervical

Pueden ser, por ejemplo:

- Dolor o rigidez de cuello
- Dolor de hombros o en la parte alta de la espalda
- Espasmos musculares
- Dolor de cabeza, que generalmente comienza en la base del cuello

Documents (continued)

- Irritabilidad, dificultad para concentrarse o falta de sueño
- Entumecimiento en el brazo o la mano
- Hormigueo o debilidad en los brazos

Tratamiento de la distensión cervical

Este problema con frecuencia mejora por sí solo. Los tratamientos apuntan a aliviar el dolor y la inflamación y a aumentar el rango de movimiento del cuello. Algunos tratamientos posibles:

- Cambios en la postura o las posiciones para dormir. Puede aliviar la tensión muscular.
- Medicamentos de venta libre o recetados. Ayudan a aliviar el dolor y la inflamación.
- Un relajante muscular puede ayudar con los espasmos musculares.
- Ejercicios de estiramiento para disminuir la rigidez del cuello.
- Masajes para disminuir la rigidez del cuello.
- Compresas de frío o calor. Ayudan a reducir el dolor y la hinchazón.

Cuándo llamar al 911

Llame al 911 de inmediato si tiene cualquiera de los siguientes síntomas:

- Entumecimiento o caída de los músculos de la cara
- Entumecimiento o debilidad, especialmente en los brazos o de un solo lado
- Dificultad para hablar o hablar arrastrando las palabras
- Visión borrosa

Cuándo llamar al proveedor de atención médica

Llame de inmediato a su proveedor de atención médica si presenta cualquiera de estos síntomas:

- Fiebre de 100.4 °F (38 °C) o superior, o según le indique su proveedor
- Escalofríos
- Empeoramiento del dolor o de la rigidez
- Síntomas que no se alivian o que empeoran
- Entumecimiento, hormigueo, debilidad o dolores fulgurantes que bajan a los brazos o las piernas
- Síntomas nuevos

Documents (continued)**WRITTEN DISCHARGE INFORMATION**

To help you manage your health after you leave our care, we will review important information with you at discharge:

- ☐ I have had my medical condition explained to me and was kept informed about my treatment
- ☐ I understand what symptoms and health problems to look out for when I go home
- ☐ I understand the following information about my new and continued medications:
 - Purpose for taking each medication
 - Potential Side effects to be aware of
- ☐ I understand the items I am responsible for after discharge such as:
 - Follow-up appointments
 - Outpatient follow-up tests
 - If the physician I am referred to does not accept my insurance I will call 1-800-Scripps (1-800-727-4777)
 - If I have an HMO insurance I will have to call my primary care physician to get a referral.
 - To request a copy of my health records I will contact (760) 633-7746
 - I know where to pick up my prescriptions or I have received a copy of my paper prescription
- ☐ The staff talked with me about whether I have the help I need.

We value your feedback! You may receive a survey and it would mean a lot to our staff if you would take the time to complete it.
Thank you for the honor and privilege of caring for you!

Instructions

THANK YOU for allowing us to treat you in the Scripps Mercy San Diego Emergency Department today. Please read these discharge instructions completely. If you have any questions, please ask your doctor or nurse. It is very important for you to understand these instructions and follow the plan that has been outlined to get you on the road to health as soon as possible. To help you further understand your condition, we have provided information about your diagnosis along with the treatment plan in the attached sheets. Please read and ask if you have any questions.

Please note:

- We did not feel you need to be admitted to the hospital today.
- Your condition may change, and if you are concerned you are getting worse, we are happy to see you again at any time.
- Please fill any prescriptions promptly, and take medications as directed.
- Make sure to follow up as instructed for post-emergency department reassessment with your doctor, or with another MD or specialist as directed, within the indicated time. If you cannot, you can go to a community clinic.

----Hillcrest Family Health Center, 4094 4th Ave, San Diego, CA 92103, 619-515-2545

If you cannot arrange follow up, then return to the emergency department for re-evaluation. Failure to follow-up as directed could lead to disability, worsening illness, or even death.

- Please return to the Emergency Dept. right away, if you have worsening symptoms, increasing pain, fever > 101F, vomiting, or any other concerning symptoms after discharge.
- If you are a smoker, we recommend you quit smoking. Please talk to your doctor for help, or call 1-800-NO-BUTTS for smoking cessation resources.
- If your blood pressure was higher than 120/80 during your time in the ED, you may have high blood pressure. Please get your blood pressure rechecked within 1 week at a clinic or with your primary care physician.

You can download the myScripps app on your phone and create an account to see any test results and show them to your doctor as needed.

Thank You!

Attached Information

CERVICAL PAIN: UNDERSTANDING (ENGUSH)

Understanding Cervical Strain

There are seven bones (vertebrae) in the neck that are part of the spine. These are called the cervical spine. Cervical strain is a medical term for neck pain. The neck has several layers of muscles. These are connected with tendons to the cervical spine and other bones. Neck pain is often the result of injury to these muscles and tendons.

Causes of cervical strain

Different types of stress on the neck can damage muscles and tendons (soft tissues) and cause cervical strain. Cervical tissues can be damaged by:

- The neck being forced past its normal range of motion, such as in a car accident or sports injury
- Constant, low-level stress, such as from poor posture or a poorly set up workspace

Symptoms of cervical strain

These may include:

- Neck pain or stiffness
- Pain in the shoulders or upper back
- Muscle spasms
- Headache, often starting at the base of the neck
- Irritability, trouble concentrating, or sleeplessness
- Numbness in the arm or hand
- Tingling or weakness in the arm

Treatment for cervical strain

This problem often gets better on its own. Treatments aim to reduce pain and inflammation and increase the range of motion of the neck. Possible treatments include:

- Changes to your posture or sleep positions. This can help ease muscle tension.

Martinez, Lelia M
MRN: 701326527, DOB: 11/9/1948, Sex: F
Adm: 3/1/2024, D/C: 3/1/2024

Documents (continued)

- Over-the-counter or prescription medicine. These help relieve pain and inflammation.
- Muscle relaxant can help with muscle spasms.
- Stretching exercises to decrease neck stiffness.
- Massage to decrease neck stiffness.
- Cold or heat pack. These help reduce pain and swelling.

Call 911

Call 911 right away if you have any of these:

- Face drooping or numbness
- Numbness or weakness, especially in the arms or on one side
- Slurred speech or difficulty speaking
- Blurred vision

When to call your healthcare provider

Call your healthcare provider right away if you have any of these:

- Fever of 100.4°F (38°C) or higher, or as directed by your provider
- Chills
- Pain or stiffness that gets worse
- Symptoms that don't get better, or get worse
- Numbness, tingling, weakness or shooting pains into the arms or legs
- New symptoms
