HISTORY: This is a follow-up visit on Ms. Lelia Martinez who is a very pleasant 75-year-old female who was involved in a MVA on 2/29/2024. She has been going to physical therapy and has noted improving neck pain. She continues to have right sided shoulder pain. She has difficulty dressing due to the pain when moving her right arm. She rates her pain to be 6/10. She has been evaluated by orthopedics and is being scheduled for imaging of her shoulder.

PHYSICAL EXAMINATION:

Vitals: Blood Pressure: 148/74 Heart Rate: 73 Temperature: 98.4 Respirations: 16

Neurologic: Alert and oriented to month, date, place and time.

Cranial Nerves: Extraocular movements are intact with no diplopia. Visual fields are full to bedside confrontation. Pupils are equal, round and reactive to light. Patient has symmetric facial sensation, symmetric facial movement, symmetric palate elevation and midline tongue protrusion. No stridor or hoarseness is appreciated.

Motor: 5/5 bilateral deltoid, biceps, triceps and grip strength. 5/5 bilateral quadriceps, knee extension, knee flexion, foot dorsiflexion, foot plantarflexion and EHL.

ASSESSMENT:

Ms. Lelia Martinez is a 75-year-old female who was involved in a MVA on 2/29/2024. The patient suffered a cervical sprain. C4-5 disc protrusion and a right shoulder injury.

PLAN:

1. Will change PT location to Spine and Sport in Hillcrest near patients home. Cervical spine PT 3x/week x 12 visits.
2. Continue treating with orthopedics for right shoulder.
3. Follow up in 3 months.
